Top reasons MSPs choose OpenText Core Managed Detection and Response

MSPs need reliable, efficient, and scalable security solutions to protect their clients and drive business growth. OpenText Core Managed Detection and Response delivers on this by offering a blend of advanced technology and expert oversight. Here's why MSPs prefer OpenText for comprehensive managed detection and response.

opentext

1 Seamless integration with existing tools

Integrates with more than 500 third-party security tools, including popular PSA tools, for easy adoption without disrupting current systems.
2 Scalable and flexible with no long-term contracts

A subscription-based model lets MSPs scale month to month with no long-term commitments, hidden fees, or minimum requirements.

3 Automation with human expertise

Combines automation with 24/7/365 expert analysis, ensuring threats are swiftly detected, prioritized, and addressed.
4 Enhanced EDR with SIEM and SOAR capabilities

Extends EDR with advanced SIEM and SOAR, offering real-time monitoring, automated responses, and rapid threat detection.

5 Rapid incident response and proactive threat hunting

Provides MSPs with rapid incident response paths for urgent threats, plus continuous threat hunting for proactive risk management.
