NetIQ Identity Manager version comparison chart

What's your version?

Comparing OpenText™ NetIQ™ Identity Manager versions and offerings:

 Included

Feature benefits	4.9	4.8	4.7	4.6	4.5
Monitoring, auditing, and compliance					
Real-time user monitoring: Observe user activities in real-time using readily available, out-of-the-box dashboards					
System overview dashboard: Visualize events related to eDirectory					
Audit dashboard: Explore user events and actions using an intuitive and flexible user interface					
Reporting: Correlate data from various sources and entities, including pre- and post-processed data					
*Workflow control: Monitor provisioning and deprovisioning workflows, including role-based access					
*Security dashboard: Track security events in real time and conduct forensic analysis on both current and past data					
*Predefined and customizable reports: Select from a range of more than 20 predefined reports with tailored customization options to align with your needs and compliance requirements					
*Time Machine history browsing: Explore user snapshots, service journal, and historical data. Compare and filter object states across different timelines, export data in CSV or LDIF format					
*ACDI system health dashboard: Crucial for monitoring overall system health (disk space, RAM, CPU) and customizable to suit specific needs					

Feature benefits	4.9	4.8	4.7	4.6	4.5
