OpenText Core Content Management Migration Services
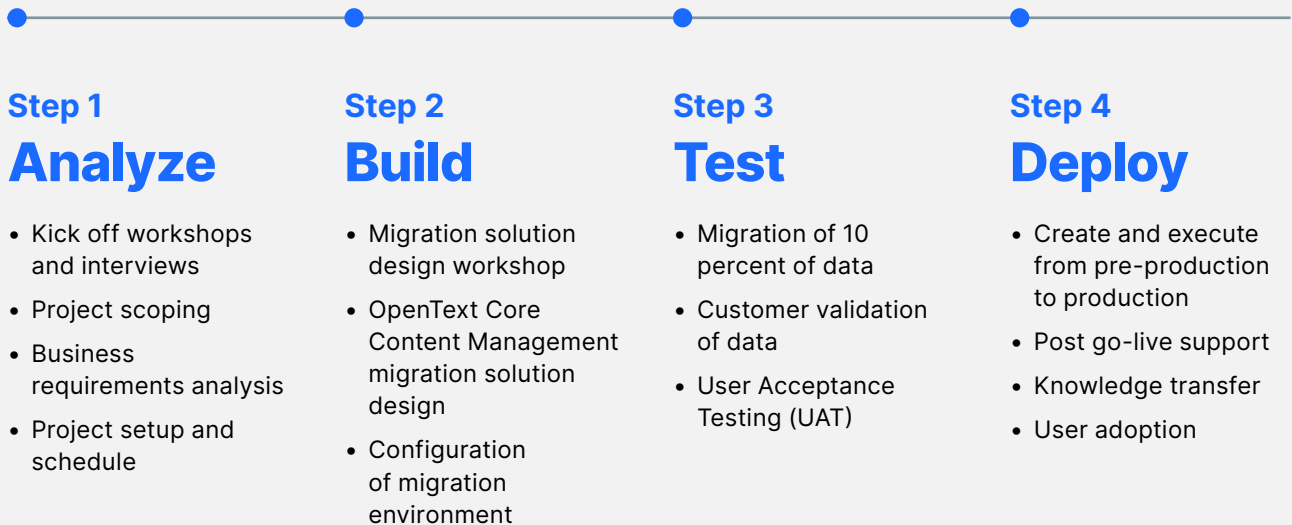

Get expert guidance moving from your existing platform to OpenText Core Content Management

Benefits

- Move to the cloud
- Mitigate risk
- Achieve faster ROI

Trust OpenText to guide you through a seamless migration from your existing solution to OpenText™ Core Content Management, our SaaS content management platform. Mitigate risk, reduce cost, and increase value by working with experts.

A clearly defined strategy along with the right tools are key to a successful migration project:

Step 1
Analyze

- Kick off workshops and interviews
- Project scoping
- Business requirements analysis
- Project setup and schedule

Step 2
Build

- Migration solution design workshop
- OpenText Core Content Management migration solution design
- Configuration of migration environment

Step 3
Test

- Migration of 10 percent of data
- Customer validation of data
- User Acceptance Testing (UAT)

Step 4
Deploy

- Create and execute from pre-production to production
- Post go-live support
- Knowledge transfer
- User adoption
