

opentext™ world 2024

Cloud Editions (CE) 24.4

Top 5 innovations

1

OpenText™ Content Aviator

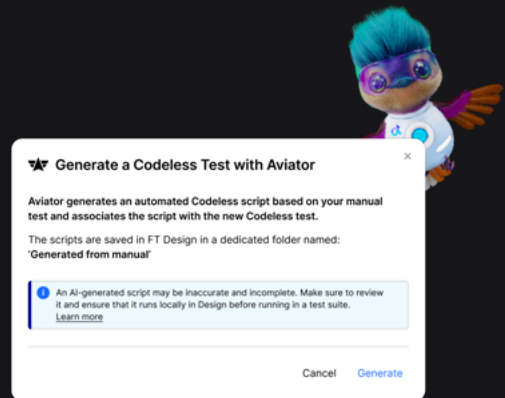

Instantly access, retrieve, and summarize data with an LLM-powered chat interface—cutting workflows from weeks to minutes.

2

OpenText™ DevOps Aviator

Generative AI automates video-to-manual test conversions and defect sequences, eliminating coding needs.

3

Corporate help desk

Unified IT, HR, and functional support on a single platform for seamless business operations.

4

Observability and discovery

Advanced tools for IT discovery and observability to optimize cloud performance across systems.

5

Threat detection and response

Insider threat detection and open XDR strategies to enhance cybersecurity defenses.

These innovations, spotlighted in CE 24.4, reflect the OpenText commitment to information management that elevates human potential.
