OpenText EMR Integration Supports COVID-19 Testing

OpenText supports COVID-19 testing as part of standard CPOE solution

Benefits

- Integrates with any clinic or long-term care EMR
- Rules-based, validated electronic orders
- Comprehensive, agile integration
- Optimizes lab and physician workflow
- Reduces IT overhead

If your lab is involved in COVID-19 testing or soon will be, OpenText™ EMR Integration is ready to help.

Whether your lab is part of the OpenText EMR Integration hub today or you are ready to connect to our hub, or expand to new physicians or long-term care facilities, we are ready to help as quickly as possible.

OpenText EMR Integration is also the only lab integration hub that can integrate to all EMRs in the long-term care market due to our unique EMR partnerships.

- We can enable COVID-19 testing in as little as 24 hours
- COVID-19 compendium changes are done at no extra charge

OpenText EMR Integration supports

- Physician outreach
- Public health reporting
- Any test or collection type: Rapid result, point of care, at home, employer/group
- Rapid digital implementations via OrdersAnywhere portal, FlexConnector or HL7 options

Submitting COVID-19 test requests

1. Send your new test requirements to: support.emr-link@opentext.com
2. OpenText will validate and upload the new compendium
3. Electronic results or bi-directional transactions can start as soon as the next day

Getting started with OpenText EMR Integration is easy:
