Additional License Authorizations

For Connected software products

This Additional License Authorizations document ("ALA") set forth the applicable License Options and additional specific software license terms that govern the authorized use of the software products specified below, and are part of the applicable agreement (i.e., Micro Focus End User License Agreement; and/or any separate agreement that grants Licensee a license to such products (e.g., Customer Portfolio Terms or other Master Agreement); and/or Quotation) (the "Applicable Agreement"). Capitalized terms used but not defined herein shall have the meanings set forth in the Applicable Agreement. All products below are delivered electronically, unless otherwise agreed, and as such, any inconsistent terms that are stated on a purchase order or any other document issued by Customer, are void.

Products covered

Products	Non-production software class [*]	Term License Non-production software class (if available)
Connected Backup	Class 3	Class 3

[*]Additional licenses solely for non-production use may be available as specified in the Non-Production Licensing Guide found at **opentext.com/about/legal/software-licensing** depending on the non-production software class specified above. Any such non-production licenses will be subject to the Non-Production Licensing Guide and the applicable License Option terms and conditions set forth in this ALA.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Agent	Means that portion of the software that manages and is required for each physical or virtual PC, laptop, or Mac device for which backup is required.
Device *or* Dev	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
Implementation	Means an installation of the software on a single Server or installed on a Cluster of Servers which work together as a single installation of the software.
Instance	Means each Implementation of the application installed on a Server.
Internal Use	Means access and Use of the software for purposes of supporting your internal operations or functions.
LTU	Means License To Use.
Media or Medium	Means typically a tape or a file on disk holding backup data.
Mirrored Server	Means the configuration of two identical Servers (OS Instances). that provide redundant storage of data and failover backup and retrieval service.
Operating System Instance *or* OS Instance *or* OSI	Means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
Single Server *or* Svr	Means a designated computer system in which an Instance or Instances of the software is installed.
Suite	Means two or more software products combined into a single license offering. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product.
Use	Means to install, store, load, execute and display one copy of the software.
Virtual Machine *or* VM	Means a computer that does not physically exist but is simulated by another computer.

Term	Definition
Workstation	Means a desktop system (for Microsoft platforms this is typically running Windows XP or Windows Vista operating system) in contrast to a server system, typically located in the data center (for Microsoft platforms this is typically running Windows 2003/2008 Server operating system).

Software Specific License Terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

Connected Backup

Connected Backup is licensed by Single Server, by Mirrored Server and by Agent.

Additional License Terms

	Term
A	Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use.
B	Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
C.	Any licensing terms designated as being of Autonomy that may be embedded in the software are inapplicable in their entirety.
