OpenText Intelligence

Increase the value of applications with realtime, interactive, highly scalable analytics and appealing visualizations, reports and dashboards

Benefits

- Create user-friendly and modern reports, dashboards and visualizations
- Embed analytics quickly and seamlessly
- Enable self-service data exploration with minimal need for IT
- Provision and analyze very large data volumes easily with robust opensource tools

In a digital world, organizations demand analytics-powered applications that deliver insights and information, and empower employees, customers and partners to take action. Organizations want to use big data from a wide range of sources to understand customers and increase engagement and loyalty. IT teams want to deliver high-scale, mobile-ready, self-service analytics enhanced with interactive reports and visualizations. Users, meanwhile, want to connect with their information and complete important tasks quickly and on any device.

OpenText™ Intelligence addresses these requirements. It provides users with relevant information in context and empowers them to make data exploration a part of their day-to-day experience.

It is a highly scalable, enterprise-grade deployment server for secure, interactive analytics applications.
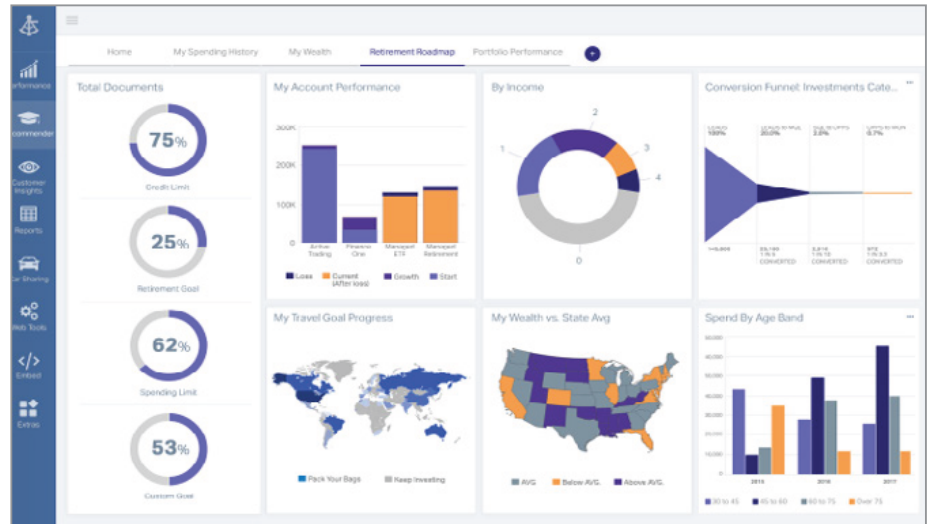

OpenText Intelligence enables users to design, deploy and manage secure, interactive web applications, reports and dashboards fed by multiple data sources. It supports high volumes of users and its wide range of integration APIs, including REST and JavaScript®, allow for easy embedding of content into any application. OpenText Intelligence displays optimally on any device, intelligently resizing and repositioning its results on both mobile and desktop screens. The solution is easy to deploy either on-premises or in the cloud.

Features:

- Explore data using interactive features, such as drill-downs, sorting, filtering and aggregating.

- Connect and combine multiple data sources and formats.

- Use a broad range of APIs, such as REST and JavaScript, to integrate analytics into any application.

- Work offline in PDF or Microsoft® Office formats for Microsoft® Excel®, Microsoft® Word and Microsoft® PowerPoint®.

- Get automated visualization options for every type of user, from casual to sophisticated, based on data types.

- Create modern dashboards leveraging a fully WYSIWYG authoring experience and auto-fit capabilities.

By providing all users with realtime information and self-service business analytics, OpenText Intelligence meets business-critical requirements. It enables modern dashboard creation and ad hoc reporting leveraging a fully "What You See Is What You Get" (WYSIWYG) authoring experience in a flexible, visually appealing environment designed to drive user autonomy. It has the scale required to deliver customer-facing applications to millions of users.

OpenText Intelligence transforms any data into meaningful insights with relevant, appealing graphics and smart visualizations, from bar or ring charts to word clouds, treemaps and histograms, so users can easily see and understand information trends. Businesses can embed these personalized analytic dashboards and interactive visualizations into their own applications, workflows and processes for maximum impact.

OpenText Intelligence gives organizations a 360-degree view of their performance.

Visualization options for every level of self-service access

OpenText Intelligence is equipped with data reporting and auto-fit display features that enable a full range of self-service capabilities for any user, regardless of skillset.

Depending on the level of interactivity and data blending needed, users can choose from:

- OpenText Intelligence Interactive Viewer for built-in functions that emphasize simplicity and ease of use.
- OpenText™ Intelligence Dashboards for visual appeal to showcase key indicators.
- OpenText™ Intelligence Analytics Studio for sophisticated, powerful reporting with the ability to add new data sources on the fly.

OpenText services available:

- OpenText™ Learning Services OpenText Intelligence
- OpenText™ Managed Services
- OpenText™ Consulting Services
- FasTrak Implementation Services for OpenText Intelligence

Quick, convenient data exploration with OpenText Intelligence Interactive Viewer

OpenText Intelligence Interactive Viewer is an easy-to-use viewing option pre-packaged with OpenText Intelligence. Within a few minutes of being introduced to the intuitive interface, even the most non-technical users can start accessing and customizing content based on their unique needs and preferences. Users can modify, save and share reports, dashboards and data visualizations with just a few clicks.

Updates at a glance with the flexible OpenText Intelligence Dashboards

For a richer reporting experience, the dashboards component aggregates multiple data sources and serves up realtime results in appealing and smart graphic visualizations. Auto-fit features make it easy to create dashboards with complex and irregular layouts, putting data at the user's fingertips. Designed to be used without training, dashboards are quick to assemble, personalize and share. State-of-the-art charts, gadgets, tables and graphical selectors, including cross-filtering and global-scope options, allow users to illustrate and explore data without IT support.

Full-featured ad hoc reporting for business users with OpenText Intelligence Analytics Studio

OpenText Intelligence Analytics Studio provides the most sophisticated ad hoc reporting design options. Drag-and-drop functionality in this integrated development environment allows advanced users to assemble and format reports for personalized business insights. Users can blend, transform and apply business logic to data, add new sources on the fly and effortlessly create ad hoc reports in the browser. OpenText Intelligence Analytics Studio includes hundreds of HTML5 charts, gadgets and maps, commercial data drivers, a metadata layer and cube design, and caching features for creating interactive and analytic content.

OpenText Intelligence	Design, deploy and manage secure, interactive web applications, reports and dashboards fed by any data source in any format leveraging smart and auto-fit features. Embed analytic content into any application and display on any device.
OpenText Intelligence Interactive Viewer	Modify, save and share reports, dashboards and data visualizations with just a few clicks. This intuitive, user-friendly viewing option is packaged with OpenText Intelligence Analytics Suite.
OpenText Intelligence Dashboards	Aggregate multiple data sources and serve up realtime results in appealing graphic visualizations for a richer reporting experience. Users can illustrate and explore data without IT support.
OpenText Intelligence Analytics Studio	Assemble reports with drag-and-drop ease by using the most powerful ad hoc reporting design options. Blend and explore data, add new sources on the fly and create personalized reports within the browser.

OpenText Intelligence Analytics Suite: Delivering more insight from data

OpenText Intelligence delivers even more value as part of the OpenText Intelligence Analytics Suite. As an integrated whole, the suite helps organizations gain insight, improve decision-making and boost operational efficiency by providing hands-on access to interactive dashboards, reports and data visualizations. It is seamlessly integrated with big data-capable, advanced and predictive analytics tool, OpenText™ Data Discovery, to identify patterns and trends.

Leveraging all data, whether it comes from databases, business applications, CRM records, Internet of Things or social media, in relevant, interactive visualizations on any device increases opportunities for growth. OpenText Intelligence Analytics Suite offers robust, enterprise-level security, scalability to millions of users and data integrity, while requiring only minimal IT intervention.
