opentext™

OpenText Content Management Integration with OpenText Core Share FasTrak

Enable your organization to share digital documents with external business partners by connecting your OpenText Content Management to OpenText Core Share.

Benefits

- Go live faster: Start with proven introductory approach
- Compliance: Manage shared content
- Control: Establish approval policy for sharing content
- Maximize adoption of sharing feature

Sharing business documents in a secured and controlled way is more important than ever. Additionally, the increasing number of people working from home requires tools that support digital collaboration. OpenText™ Content Management is ready to support different sharing scenarios. It easily connects with OpenText Core Share.

With the OpenText Content Management Integration with OpenText™ Core Share FasTrak, our experts in OpenText Professional Services have built a best practice procedure to enable your organization to share business documents in a secured way, establishing a framework to control and manage the shared content.

Go live faster with new functionality

The OpenText Content Management Integration with OpenText Core Share FasTrak follows a proven methodology to help customers to go live rapidly. OpenText consultants will not only connect your platform to the OpenText Core Share SaaS application, but also review your existing OpenText Content Management architecture to ensure everything is in place to support your end users with all the new functionality.

Manage the compliance of sharing documents

Keep control. The OpenText project team will help you to establish a compliance framework for sharing documents. This begins with configuring sharable folders types, users and groups. The introduction of an approval workflow for new shares enhances your control over what will be shared with whom. While the system automatically monitors the existing shares for duration, additional reports can give your administrators insight into the currently open shares.

Bring your project team up to speed

Despite the new functionality is very easy to use for business users, it is important to understand the security and control features that are available. Before the project starts, we work with your project team and enable them on the new functionality. This ensures that they get the most out of the functional workshops with the OpenText consulting team.

End user adoption

Adopting new functionalities and processes can be a challenge inside larger organizations. The OpenText Content Management Integration with OpenText Core Share FasTrak supports business users with an eLearning approach so they can educate themselves on the new features when they need it, when it is most convenient for them.
