OpenText MxDR Advanced EDR Agent

Autonomous, next-gen EPP and EDR

Benefits

- Protect endpoints in real time
- Detect threats without human intervention
- Remediate threats with automated or one-click response actions

As digital landscapes transform, the speed, sophistication, and scale of threats against endpoints have also evolved. User endpoints remain a key attack vector for malicious actors seeking deeper access to your network. Meanwhile, security analysts are overwhelmed with the sheer number of false positives and alerts, which require time-consuming manual investigation. Security teams need a more efficient and robust solution to secure every endpoint in their environment.

OpenText MxDR Advanced EDR Agent, powered by SentinelOne™, combines next-gen prevention with real-time detection and response in a single platform with a single agent, empowering security teams to easily identify and secure every user endpoint on their network.

Industry-leading endpoint protection

Deliver unparalleled endpoint protection and detection with broad visibility, rapid response times, and minimal incident dwell time. As evidenced in the 2022 MITRE Engenuity™ ATT&CK® Evaluation, SentinelOne delivered 100-percent protection and detection with zero delays and the highest analytic coverage in real time.

- AI-based malware and ransomware protection
- Patented one-click remediation and rollback
- Industry-leading coverage for Windows®, Mac®, and Linux®, including legacy OSes
- Autonomous operation. Works on-and off-network
- Hunt by MITRE ATT&CK® Technique
- Rapid deployment interoperability features ensure a fast, smooth rollout

Built-in automation quickly contains attacks

Patented Storyline™ technology provides analysts with real-time actionable correlation and context. Analysts can understand the full story of what happened in the environment with automatic linking of all related events and activities together with a unique identifier.

Automate response to affected endpoints to reduce the mean time to respond. Autonomously resolve threats with our patented one-click remediation to reverse all unauthorized changes.

Streamlined security

Investigate, triage, and hunt with zero learning curve to bring IR and hunting to a broader pool of security talent. Uplevel SOC resources for proactive threat hunting with automated hunting rules, intel-driven hunting packs, and support for MITRE ATT&CK techniques. Easy-to-use search and pivot lighten analyst load to hunt across large volumes of EDR telemetry.

Scalable security managed service

MxDR Advanced EDR Agent is architected as a highly available cloud solution delivered as a managed security service from our 24×7×365 Security Operations Team. Best-in-industry coverage across all major operating systems and a rich integration ecosystem extend the platform to your existing security investments.

Secure every endpoint in your environment

OpenText MxDR Advanced EDR Agent provides a comprehensive solution to secure every endpoint, no matter where they are in your world. The OpenText Managed Security Services Team extends security operations of small and medium businesses, enterprise and public sector customers. OpenText is your partner along your journey to cyber resilience.
